   • 1.1 Management Layers ............................................................................... 1
   • 1.2 Operation of each Tab Page of Website of AXView Solution .................... 2
I. System Management and Operation

1.1 Management Layers

Diagram 1.1-1 Different roles played in the AXView solution

A. Dealer/SI (backend user of AXView solution – login from HERE)
   i. Dealer/SI is to play this role (the second layer in Diagram1.1-1)
   ii. Play in managing group users and in conducting routine on-line maintenance.
1.2 Operation of each Tab Page of Website of AXView Solution

A. Survey: as shown in Figure 1.2-1, this tab page provides for managing group user.

Figure 1.2-1 Snapshot of “Group Mgmt” tab page of AXView solution website

i. Disable: suspend a group to use this solution.

ii. Save: modify data of group user. (* ONLY Group ID could not be modified.)
iii. **Disable List:** as shown in Figure 1.2-2

01. List all be suspended group.

02. You can do reactivation to a group user by selecting that Group ID and clicking “Activate”.

![Figure 1.2-2 Snapshot of “Disable Group List” page of AXView solution website](image)

Figure 1.2-2 Snapshot of “Disable Group List” page of AXView solution website
B. Station Mgmt: as shown in Figure 1.2-3, this tab page shows today status of station of the group user you selected.

Figure 1.2-3 Snapshot of “Station Mgmt” tab page of AXView solution website
i. Select a “Group” first, then choose a “Station”, that you want to check, in drop-down list, then you can browse status of power generation and efficiency of inverter and modify information of some station that belongs to the group you selected. And you can modify items as follows:

01. Station Name
02. Price of per KWh
03. Station Photo (upload a photo)
04. Location (just move map and click location you want)

ii. If you want to browse more detail information/status of this station, you could click “View Station”.

01. Current Page: as shown in Figure 1.2-4, this page illustrates the geographical location and the equipment on the user site; whereas the right hand side of the figure illustrates the condition of power generation in real time environment.
Figure 1.2-4 Snapshot of “Current” page of AXView solution website

a. The meaning of charts shown at the upper right hand corner of “Current” page

- “Inverter(s) Generated Power with Reference”:
  Light color refers to the accumulative power volume measured at each inverter today. Dark color refers to the daily average power volume measured at each inverter during the same months in last year.

- “Hourly Generated Power with Reference”:
  The curve refers to the hourly average power volume in each hour during the same months in last year. Vertical bar refers to the accumulative power volume in...
each hour today.

b. The meaning of icons shown at the lower right hand corner of “Current” page

- : Temperature in the environment at the site (optional)
- : Humidity in the environment at the site (optional)
- : Intensity of the sun light (optional)
- : The accumulative power volume during today and in the past
- : The profit from power generation during today and in the past (optional: if you sold the generated power.)
- : The reduction of CO2 emission volume and area of forest cut-down due the use of solar power in the past

c. You can change to browse status of another station by selecting station in the drop-down list of “Station” in upper left.
d. You can review condition of power generation of other day by selecting the date, which you want to review, in textbox of “View at” or key-in date in format of “MM/DD/YYYY”, as shown in Figure 1.2-5.

![Figure 1.2-5 Snapshot of date selection](image)

02. Efficiency Page: as shown in Figure 1.2-6, the left hand side of the figure illustrates the geographical location and the equipment on the user site; whereas the right hand side of the figure illustrates the condition of power generation in real time environment.
a. The meaning of charts shown at the upper right hand corner of “Efficiency” page

○ “Average Daily Inverter Efficiency (%):”

The curve shown at the upper right hand corner represents the daily conversion efficiency of the power generation in this month.

○ “Unread Event and Exception”: 

The table shown in the middle part of the right hand side represents the records
of abnormal incidents been detected by the system. And clicking “Delete”, the message you selected will be moved to “Have Read” page.

 “(Have Read)”:

This hyperlink directs to “Have Read” page and shows the event messages that you have read. As shown in Figure 1.2-7.

![Figure 1.2-7 Snapshot of “Have Read” page of AXView solution](image)

b. The meaning of icons shown at the lower right hand corner of “Efficiency” page

- : Temperature in the environment at the site (optional)
- : Humidity in the environment at the site (optional)
- : Intensity of the sun light (optional)
c. You can change to browse status of another station by selecting station in the drop-down list of “Station” in upper left.

d. You can review condition of power generation of other month by selecting the month, which you want to review, in textbox of “View in” or key-in date in format of “MM/YYYY”. As shown in Figure 1.2-8.

Figure 1.2-8 Snapshot of date selection
03. History Page: as shown in Figure 1.2-9, the left hand side of the figure illustrates the geographical location and the equipment on the user site; whereas the right hand side of the figure illustrates the condition of power generation in real time environment.

Figure 1.2-9 Snapshot of “Efficiency” page of AXView solution website

a. The meaning of charts shown at the upper right hand corner of “History” page

 “Monthly Generated Power with Reference”:

    The vertical bar refers to the accumulative power volume in each month of the
year. The curve refers to the average power volume in each month in the past.

- “Monthly Pyranometer with Reference”:
  The vertical bar refers to the accumulative sunlight volume in each month of the year. The curve refers to the average sunlight volume in each month in the past.

- “Monthly Income with Reference”:
  The vertical bar refers to the accumulative profit in each month of the year. The curve refers to the average profit in each month in the past.

C. Group Create: as shown in Figure 1.2-10, this tab page provides for creating a group user account (*Group ID will be login ID for group user to login website of AXView solution and must be eight characters in numbers)

![Create Group Page](image)

*Figure 1.2-10 Snapshot of “Create Group” page of AXView solution website*
D. Settings: as shown in Figure 1.2-12, this tab opens another web page for changing the login password of user.

![Change Password Page](image)

Figure 1.2-11 Snapshot of “Change Password” page of AXView solution website

E. Logout: this tab is for logging out of the system.
