Safety Precautions
Before getting started, please read the following important safety precautions.

1. Be sure to ground yourself to prevent static charge when installing any internal components. Use a grounding wrist strap and place all electronic components in any static-shielded devices. Most electronic components are sensitive to static electrical charge.

2. Disconnect the power cord from the GOT315WL-845-PCT series prior to any installation. Be sure both the system and all external devices are turned off. Sudden surge of power could ruin sensitive components. Make sure the GOT315WL-845-PCT Series is properly grounded.

3. Do not open the system’s back cover. If opening the cover for maintenance is a must, only a trained technician is allowed to do so. Integrated circuits on computer boards are sensitive to static electricity. To avoid damaging chips from electrostatic discharge, observe the following precautions:

   • Before handling a board or integrated circuit, touch an unpainted portion of the system unit chassis for a few seconds. This will help to discharge any static electricity on human body.

   • When handling boards and components, wear a grounding wrist strap available from most electronic component stores.

Section 1
Introduction

This Section contains general information and detailed specifications of the GOT315WL-845-PCT, including the following subsections:

![Figure 1-1 Front panel of the GOT315WL-845-PCT](image)

- General Descriptions
- Specifications
- Dimensions and Outlines
- I/O Outlets
- Packing List

1.1 General Descriptions

The GOT315WL-845-PCT adopts a 15.6-inch WXGA TFT LCD with 400-nit brightness and an Intel® Pentium® Processor N3710 (2M Cache, up to 2.56 GHz), providing excellent computing performance and thermal resistance. This fanless platform is especially designed for operation under a harsh environment including steel refinery, oil pipe, ship, machine maker, and many more. Having abilities below surely makes GOT315WL-845-PCT a most robust and cost-effective solution.

- **Design for extended operating temperature range and ingress protection**

  The GOT315WL-845-PCT is featured by a technology to sustain extended operating temperature range between 0°C and +50°C by incorporating compact ID and fanless cooling system with a low power Intel® Pentium® Processor N3710 (2M Cache, up to 2.56 GHz). It also adopts an IP65 front bezel to protect itself from liquid and dust. These designs help make the system a power-efficient solution.

- **Reliable and stable design**

  The GOT315WL-845-PCT is specially designed for vibration-prone environments, best for the transportation (vehicle, railway, marine) and industrial machinery markets. To suit the need of high capacity storage, the GOT315WL-845-PCT can work in operation mode under 1.0G (10 ~ 500Hz) with a patent of anti-vibration design. The design behind the patent has improved the system reliability and sustainability. (Note: Sometimes heavy-vibration may cause the LCD screen to flash in white color; however, it won't affect the function of the product.)
WLAN antenna supported (optional)

The GOT315WL-845-PCT comes with 2 PCI Express Mini Card slots as an add-on option to connect a wireless LAN card under 802.11 a/b/g/n protocols, or with other 3G/GPRS applications, etc. These slots also come with 3 optional fixed rotational WLAN/3G antennas for wireless network connection.

Multi-Touch PCAP touch with 7H surface hardness

The GOT315WL-845-PCT is designed with a user friendly multi-PCAP touch. Users can operation it with direct touch. The surface hardness is up to 7H, good for applications of anti-scratch purpose.

Other features

The GOT315WL-845-PCT utilizes one 204-pin DDR3L SODIMM system memory up to 8GB at the maximum, one SATA HDD and one mSATA. It provides an over-current protection-fuse and a full set of I/O including RS-232/422/485, USB 2.0, USB 3.0, audio (line-out), and Gigabit Ethernet. Additionally, this slim unit supports panel mount as the standard installation, as well as optionally wall mount, VESA mount and desktop stand mount.

1.2 Specifications

Main CPU Board

1.5 Packing List

A complete bundled package should contain the following items:

- GOT315WL-845-PCT unit x 1
- Driver disc x1 (various OS versions and bundles available)
- Phoenix connector x 1 (DC power version only)
- Power Adapter & power cord (AC adapter version only)
- Panel mount kit x 12
- Screws for HDD x 2
- SATA data cable x 1
- SATA power cable x 1

Please contact an Axiomtek distributor immediately if any of the above-mentioned items is missing.
Section 2
Hardware and Installation

The GOT315WL-845-PCT provides rich I/O ports and flexible expansion for users to meet different demands; for example, in a case of CF card expansion. This Section describes hardware installation, including the following subsections:

- Board Layout
- Jumper and Connector Setting
- Mounting Methods
- Hardware Installation
- Power Input

### 2.1 Board Layout

Please follow the steps below to open the GOT315WL-845-PCT unit.

**Step 1** Unscrew 8 screws (see red circles in Figure 2-1) on the back cover.

*Figure 2-1 Back cover*

**Step 2** Remove the back cover.

*Figure 2-2 Board layout*
2.2 Jumper and Connector Settings

Jumper is a small component consisting of jumper clip and jumper pins. Install jumper clip on 2 jumper pins to close the pins. And remove jumper clip from 2 jumper pins to open the pins. Diagram 2-1 illustrates how to set up a jumper.

![Diagram 2-1 Definitions of pin settings](image)

Before applying power to GOT315WL-845-PCT, please make sure all of the jumpers and connectors are in default position as listed in Table 2-1.

### 2.2.1 ‘Auto Power On’ Jumper (JP3)

There are two ways to set up auto power on function. One is jumper setting, the other one is switch setting. One of them is setting by AT that system will be AT mode.

If JP3 is enabled for power input, the system will be automatically power on without pressing soft power button. If JP3 is disabled for power input, it is necessary to manually press soft power button to power on the system (see Table 2-2).

### 2.2.2 ‘Restore BIOS Optimal Defaults’ Jumper (JP6)

Put jumper clip to pin 2-3 for a few seconds then move it back to pin 1-2. Doing this procedure can restore BIOS optimal defaults (see Table 2-3).

2.3 Ethernet Connector

There are two RJ-45 connectors, LAN1 and LAN2, inside the GOT315WL-845-PCT. Ethernet connection can be established by plugging one end of the Ethernet cable into this RJ-45 connector and the other end (phone jack) to a 1000/100/10-Base-T hub.

Please refer to Table 2-5 for detailed pin assignment for LAN1 and LAN2.

2.4 Mounting Methods

There are four ways to install the GOT315WL-845-PCT, namely: panel/ VESA/ wall/ desktop mount.

The GOT315WL-845-PCT provides a standard panel mount kit. It can be installed by way of panel mount (see Figure 2-1, 2-2).

Figure 2-1 Panel mount (back chassis)

![Figure 2-1 Panel mount (back chassis)](image)

Figure 2-2 Panel mount kit

![Figure 2-2 Panel mount kit](image)
Alternatively, the GOT315WL-845-PCT can be installed by way of VESA mount which is in the dimensions of 100x100 mm. Simply fix four screws to fasten the kit from the back chassis, as shown in Diagram 2-3. Additionally, users can otherwise go for wall mount as an option, as shown in Diagram 2-4.

Diagram 2-3 VESA mount (back chassis)

Diagram 2-4 Wall mount (back chassis)
2.5 Hardware Installation

2.5.1 Installing a HDD

The GOT315WL-845-PCT provides a convenient Hard Disk Drive (HDD) bracket for users to install a 2.5” SATA HDD. Please follow the steps:

Step 1  Refer to Section 2.1 to open the back cover and disassemble the HDD tray by un-screwing the 2 screws (as shown in the red circles in Figure 2-5).

Figure 2-5 Separating the bracket from the HDD tray

Step 2  Fasten a HDD from the back side of the bracket with two screws (see Figure 2-6).

Figure 2-6 Fastening a HDD to the bracket
Step 3  Lodge the two points on to the holes on the HDD tray (see red circles in Figure 2-7) and fix the bracket onto the HDD tray with two screws. Also, please make sure the two holes at the back of the HDD are embedded into the lower two highlight points on the HDD tray (see blue circles in Figure 2-7) to secure the entire bracket and the HDD.

Figure 2-7 Putting the bracket back to the HDD tray

Step 4  Plug two cables – one for SATA and the other for Power - to two connectors (see Figure 2-8) to complete the installation.

Figure 2-8 Connecting cables to connectors
2.5.2 Installing a DRAM

The GOT315WL-845-PCT provides one 204-pin DDR3L SODIMM socket that supports system memory up to 8GB. Please follow steps below to install a memory module:

Step 1  Refer to Section 2.1 to open the back cover.

Step 2  Locate the DIMM socket (as shown in Figure 2-9) on mainboard (Part No. SBC87845).

Step 3  Insert a DRAM into the DIMM socket, and then push it down firmly until it is clipped with the socket (as shown in Figure 2-10). Now the installation is completed.
2.5.3 Installing a Wireless LAN Card

The GOT315WL-845-PCT comes with two Mini card slots for users to install wireless LAN cards. Users can choose either Slot 1 or Slot 2 to install the wireless LAN card. Please refer to the following instructions and illustration for the installation of the wireless LAN card.

Step 1 Refer to Section 2.1 to open the back cover; then locate the Mini card slot (as shown in Figure 2-11) on the mainboard.

![Figure 2-11 Slots 1 and 2 spots](image)

Step 2 Insert the wireless LAN card to one of the two slots. Push it down firmly. Then screw tightly the card to the mainboard (see Figure 2-12).

![Figure 2-12 Inserting and securing a wireless LAN card](image)
Step 3  Locate the antenna cable and connect it to the wireless LAN card (see Figure 2-13).

Figure 2-13 Connecting the antenna to the wireless LAN card

Step 4  Remove the antenna plug from the top of back cover, and then install the antenna on the antenna connector (see Figures 2-14 and 2-15).

Figure 2-14 Antenna outlet (internal view)

Figure 2-15 Antenna outlet (external view)

NOTE: Please use an extended bracket when using a half-size Mini card.
2.5.4 Connecting the Power Input

The GOT315WL-845-PCT is equipped with a Phoenix type of power connector which adopts 24VDC. Please follow the signs on the power connector to connect DC power source (see Figure 2-16).

Section 3
AMI BIOS Setup Utility

This Section provides users with detailed descriptions about how to set up basic system configurations through the AMI BIOS setup utility.

3.1 Navigation Keys

The BIOS setup/utility uses a key-based navigation system called hot keys. Most of the hot keys for the BIOS setup utility can be used at any time during the setup navigation process. These hot keys include <F1>, <F2>, <F3>, <F4>, <Enter>, <ESC>, arrow keys, and so on (as listed in Table 3-1).

**NOTE:** Some of navigation keys may differ from one screen to another.

3.2 Main Menu

System Date / Time
Use this option to change the system time and date. Highlight System Time or System Date using the up/ down/ left and right arrow keys (see Figure 3-1). Enter new values through the keyboard. Press the <Tab> key or the arrow keys to move between fields. The date entered must be in the MM/DD/YY format. The time is entered in HH:MM:SS format.
3.3 Advanced Menu

The Advanced menu allows users to set configurations of the CPU and other system devices. Select any item on the left to go to the sub-menus (as shown in Figure 3-2).

► NCT6106D Super IO Configuration
► Hardware Monitor
► ACPI Settings
► CPU Configuration
► SATA Configuration
► USB Configuration
► Utility Configuration
► PCIE/mSATA Mini Card Configuration

Simply highlight the item of choice, then press <Enter> to go to sub-menus for more specific options.
3.3.1 NCT6106D Super IO Configuration

The ‘NCT6106D Super IO Configuration’ page is to change the value of the Super IO Configuration. The description of the selected item will appear on the right side of the screen (as shown in Figure 3-3). For items marked with “►”, please press <Enter> for further options (as shown in Figure 3-4).
