|  | Yes | No | Summary Description  | Listed Companies and the Reasons  |
| 1. Has the Company established a governance framework for promoting sustainable development, and established an exclusively (or concurrently) dedicated unit to be in charge of promoting sustainable development? Has the board of directors authorized senior management to handle related matters under the supervision of the board? | V   |    | 1. To assist the Board of Directors to continue to promote risk assessment and countermeasures in all aspects of corporate environmental, social and corporate governance, and to implement the purpose of sustainable management. To implement corporate sustainable development, the "Sustainable Development Committee" was established on October 26, 2023. The first Sustainable Development Committee is composed of President Huang, Jui-Nan and two independent directors Yu, Chwo-Ming and Chang, Jen-Chih, with President Huang, Jui-Nan serving as convener and chairman of the meeting. The Company's shareholders' meeting fully re-elected directors on May 24, 2024. President Huang, Jui-Nan, Independent Director Yu, Chwo-Ming and Independent Director Lin, Hsiu-Ting served as members of the Second term of Sustainable Development Committee. President Huang, Jui-Nan continued to serve as the convener and chairman of the meeting. The Promotion Office (Human Resources unit) was established to oversee the committee's affairs, integrate the annual plans and execution results of each working group, report them to the Sustainable Development Committee, and coordinate and track the implementation of the committee's annual plans with each working group.  2. The Promotion Office of the "Sustainable Development Committee" regularly reports to the Board of Directors on its operational results (including the communication with stakeholders), as well as issues of concern to stakeholders, specific promotion plans and implementation status. In the next year, the Sustainability Report will be completed and placed on the Company's website for stakeholders to view. On October 29, 2024, the relevant handling situation was reported to the Board of Directors, and the Board of Directors listened to the report of the management policy, strategy and target formulation and review measures reported by the management, regularly review the progress of the strategy, and urge the | Comply with the "Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies" |

|      | Yes |    | accidents that were commuting accidents. Since commuting accidents involving workers are not considered occupational accidents under the Occupational Safety and Health Act, they do not need to be included in the calculation of the disabling injury frequency and disabling injury severity rate. The Company non-periodically promotes defensive driving and other traffic safety concepts through electronic newsletters, reminding colleagues to not only abide by traffic rules but also be aware of their surroundings, develop a mindset to anticipate potential accidents, and take necessary defensive actions in advance to prevent accidents.  The Company obtained the TOSHMS Taiwan Occupational Safety and Health Management System Certification of the Labor Committee and regularly conducts employee health inspections and safety and hygiene lectures every year.  The Company has a resident nurse service, and a physician to Xizhi plant for 3 hours each time. In addition to routine attendance to employee health and health guidance, maternal health protection and abnormal workload, any employee who has physical and mental health issues can make an appointment for consultation. In addition, to achieve the purpose of the occupational safety and health policy, "pay attention to employee safety and comply with occupational safety regulations", specific measures include:  1. Implement occupational safety training for incumbents by 4 hours every 3 years.  3. Regular implementation of occupational safety management system to audit each deficiency. the Company's core values and corporate operations, promote corporate volunteers to serve a good culture, make corporate volunteers an important resource for building a good civic environment, and work together to care for society and change the world.

The Company has invested in social welfare activities in the past two years as follows:

| Year   | Month | Day | Item  |
|--------|-------|-----|---|
|        | Nov   | 26  | During the week of Thanksgiving, the "IEI Blood Donation Day" event was held once again. Employees expressed their gratitude by giving back to society and helping others with their generous blood donations.  |
|        | Oct   | 16  | Participate in the E.Sun Bank perpetual deposit project, jointly commit to sustainable development, take concrete actions in response to climate change, implement environmental protection and other impacts, and practice ESG together. This perpetual deposit funds will be used for green, ESG and other related credit and investment projects. Please refer to Note 9.                          |
| 2024   | Feb   | 23  | 2024 Lantern Festival: Tangyuan Feast x ABRAZO Charity Sale In addition to the lively Lantern Festival celebration, we invited ABRAZO to our company for a charity sale. With their sincere hands, children with Down syndrome lovingly crafted handmade cookies, each filled with warmth and care. Let's join in the spirit of "embrace" to support them and individuals with disabilities!          |
| Jan 29 |       | 29  | Lovenature Workshop Charity Sale Before the Lunar New Year, we invited Lovenature Workshop to hold charity sales at both our Xizhi headquarters and factory. This event allowed employees to purchase festive gifts while supporting children with disabilities. Through hands-on work, these children can develop professional skills and build a brighter future.                                   |
|        | Dec   | 21  | The Welfare Committee purchased handmade cookies from Bear House on Christmas and shared them with all colleagues, warming the hearts of Axiomtek colleagues and public welfare organizations in the cold winter.   |
|        | Sep   | 22  | On the eve of Christmas, the "Axiomtek Blood Donation Day" event was held for the first time. Successful blood donors can also receive a charity cake, which not only injects blood and warms others, but also warms public welfare organizations. Love never stops.  |
| 2022   | Sep   | 11  | Mid-Autumn Festival shares the love of Axiomtek colleagues, and specially invites the Lovenature Workshop in New Taipei City to hold a charity sale of "Love in Mid-Autumn Festival, Full of Happiness".  |
| 2023   | Jun   | 20  | Participated in the sustainable deposit project of E.SUN Bank, jointly committed to sustainable development, taking specific actions to address the impacts of climate change and environmental protection, and practicing ESG together. This sustainable deposit fund is used for credit and investment projects that comply with green and ESG sustainability requirements. Please refer to Note 9. |
|        | Feb   | 03  | The Welfare Committee organized the "Dragon Boat Festival Celebration" event, and in conjunction with the charity sale event of the Lan-chui Social Welfare Foundation, Axiomtek employees worked together to promote charity.  |

- (3) Support for Cultural Development Strategies Program
  - To encourage employees to get in touch with cultural and artistic activities, performance venues, etc., and respond to the government's policy of cultivating arts and cultural consumption habits, the Company encourages employees to consume arts and cultural consumption. On March 2, 2024, the Welfare Committee invited colleagues to watch the Godot Theatre Company's performance of "I Work in a Scam Company" at the National Theater for free. A total of 60 people participated in this event, which cost NT\$38,400. On May 4, 2024, on the eve of Mother's Day, colleagues were invited to listen to the OneSong Orchestra's thrilling concert.
- (4) To support local education and increase students' practical work experience, the Company actively collaborates with major universities for industry-academia cooperation. From October 2023 to October 2024, we collaborated with the Department of Electrical Engineering of Fu Jen Catholic University on the National Science Council's Industry-Academia Cooperation Project. Since June 2023, we provided Ph.D. students from the Department of Computer Science and Engineering of Fu Jen Catholic University with practical work training, so that they could directly join the Company after graduation. Beyond these efforts, Axiomtek is committed to local talent development and sustainability by actively recruiting professionals from Keelung, Xizhi, and Nangang. As a result, the proportion of local employees (excluding foreign migrant workers) has increased from 19% (115 employees) in 2023 to 21% (130 employees) in 2024.
- (5) Purchase energy-saving equipment air compressors for approximately NT \$1.14 million, with an annual power consumption reduction of 95304 kWh and a carbon reduction of 56.23 (tons of CO2e/year).
- (6) Climate-Related Information: Note 10

Note 1: If "Yes" is ticked in the "Implementation status" column, please concretely describe the major policies, strategies, and measures adopted and the status of their implementation. If "No" is ticked in the "Implementation status" column, please explain the deviations and the reasons in the "Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies and the Reasons" column and explain the Company's plans for adoption of related policies, strategies, and measures in the future. However, for Items 1 and 2, the TWSE/TPEx listed company shall describe its governance and supervisory framework for sustainable development, including but not limited to management policy, strategy and goal formulation, review measures,

etc. It additionally shall describe the Company's risk management policies or strategies for operations-related environmental, social, and corporate governance issues, and their assessment status.

Note 2: The principle of materiality refers to those who have a significant impact on the Company's investors and other stakeholders in relation to environmental, social and corporate governance issues.

#### Note 3: Sustainable Development Committee

| Member   | Organizational Function   |
|--|---|
| Corporate<br>Governance Team                       | Responsible for compliance with corporate governance laws and regulations, establishing reasonable compensation policies and employee performance appraisal systems, education and training, and stakeholder communication mechanisms to achieve the Company's goal of sustainable development.   |
| Sustainable<br>Environment<br>Team                 | Responsible for the environmental management system, compliance with environmental laws and regulations and international standards, evaluation of sustainable transformation, improvement of resource utilization, climate change response mechanism, and establishment of dedicated environmental management units or personnel to achieve the goal of environmental sustainability.  |
| Social Welfare<br>Team                             | Responsible for human rights management policies and procedures, compliance with human rights-related laws and regulations and international standards, establishing internal and external communications among all members of the organization (such as employees, subsidiaries, joint ventures, etc.) and key members of the value chain, assessing related risks and management mechanisms, and promoting community and cultural development to achieve the goal of sustainable operations.  |
| Sustainability<br>Information<br>Disclosure Team   | Responsible for the sustainable information management policy, compliance with relevant laws and regulations and international standards for sustainable information disclosure, and fully disclose relevant and reliable sustainable information to enhance the transparency of sustainable information.  The inter-departmental team shall execute the tasks assigned by the preceding paragraph, organize and implement the plan or other sustainability-related matters, and submit the implementation results to the full-time (part-time) sustainable development unit or this committee. |
| Risk Management<br>Team                            | Responsible for conducting various risk management and assessments based on the environmental, social, and governance management frameworks, regularly reviewing whether various systems can achieve operational objectives, ensuring the integrity, effectiveness, and rationality of the Company's operational, financial, environmental, internal control, and legal risk project management, and regularly reporting the Company's risk management overview to the board of directors.  |
| Information and<br>Communications<br>Security Team | Responsible for formulating, planning and implementing information and communications security policies, and regularly reporting to the Board of Directors on the Company's information and communications security governance status.  |

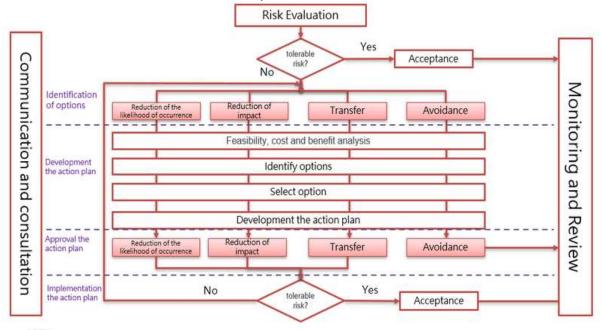

## Note 4: Identifying the boundary of the consideration area

Based on the identification of each major concern, Axiomtek evaluates its impact and decides the impact on the internal and external aspects of the organization through conferences and discussions. It is divided into the internal boundary of the organization and the external boundary of the organization. The internal boundary of the organization includes Axiomtek and its subsidiaries, and the external boundary objects of the organization include customers and suppliers.

| Issues of Concern | Boundary                                 |          | onal Internal<br>daries | Organizational<br>External Boundaries |          |

## I. Environmental management policy

Axiomtek environmental policy is "Environmental Protection and Sustainable Resources". The participation of all staff, continuous improvement, improvement of working methods and management skills, so that the Company's products, service quality, environmental management can meet the needs of customers, the annual environmental policy, goals, measures to achieve are listed as follows:

| Environmental Policy |   |  |  |  |
|----------------------|---|--|--|--|
| Policy Goal          | Boundary less environmental protection; sustainable resources                               |  |  |  |
|                      | 1. Workplace environment measurement pass rate is 100%                                      |  |  |  |
|                      | 2. The pass rate of drinking water quality testing is 100%                                  |  |  |  |
| Т4                   | 3. Energy consumption is reduced by 1.5% per year.  |  |  |  |
| Target               | 4. Greenhouse gas emission reduction of 1.5% per year                                       |  |  |  |
|                      | 5. Conserving water, the average water consumption per person decreases by 1.0% per year    |  |  |  |
|                      | 6. The proportion of non-recyclable business waste decreases by 1.0% from the previous year |  |  |  |
| Strategy to          | Strictly abide by environmental laws and regulations, implement environmental education     |  |  |  |
| Meet Targets         | management, and reduce the impact of the global environment                                 |  |  |  |
| Measures to          | 1. Workplace environment compliance twice a year.   |  |  |  |
| Achieve              | 2. Test drinking water quality 4 times a year   |  |  |  |

| Targets | 3. Monitor and review monthly electricity/water usage |
|---------|---|
|         | 4. Monitor and review annual GHG/waste output         |

Axiomtek has been using the lead-free manufacturing process since 2006. In order to avoid cross-contamination of production equipment, lead-free Wave Flow is uniformly used. During the manufacturing process, ventilation facilities are installed in the reflow furnace, tin furnace, and repair area to protect the employees from smoke and other harmful emissions. Waste generated from the manufacturing process is collected every 2 hours, according to Axiomtek's policy. The waste collected is consolidated and then removed by a company appointed waste management vendor.

### II. Energy Consumption

## (I) Energy consumption inventory

#### Electrical Power

Electrical power is the main source of energy in Axiomtek's production and business operations. From the perspective of energy intensity, the per capita electricity consumption is calculated based on the electricity consumption and the number of electricity users. In 2024, the per capita electricity consumption increased by 31.95% compared with the previous year. This is mainly due to the increase in the electricity fee collection rate of government agencies in 2024. In addition, the statistical scope of 2024 included Axiomtek's Taichung office, which is different from the statistical basis of the previous year, resulting in a significant increase in per capita electricity consumption.

| Year                                    | 錯誤! 找不到參照<br>來源。 | 錯誤! 找不到參照<br>來源。 |
|---|------------------|------------------|
| Electricity Consumption/ Million Joules | 13,797,759       | 10,272,654       |
| Electricity Users                       | 682              | 670              |
| Electricity per Person / Year           | 20,231           | 15,332           |

#### 2. Water Resource

Axiomtek's manufacturing process does not require water or industrial wastewater, so water is consumed only in common daily use. Since the Company is in a public park and is not a privately owned factory, it is difficult to recycle and reuse, and the emissions are fully managed by the park administration for centralized treatment and discharge.

Examining the trend of water consumption over the years, there is a clear downward trend in per capita water consumption in 2024. This is mainly because Axiomtek's headquarters and factories have installed water-saving faucets and strengthened the promotion of water-saving measures, allowing employees to develop water-saving habits in their daily lives. The obvious decline in per capita water consumption is enough to show its effectiveness.

| Year                                | 錯誤! 找不到參照<br>來源。 | 錯誤! 找不到參照<br>來源。 |
|-------------------------------------|------------------|------------------|
| Water Consumption                   | 7,338            | 10,603           |
| Number of People                    | 682              | 670              |
| Per Capita Water Consumption / Year | 10.76            | 15.83            |

## 3. Greenhouse Gases

In addition to data on power and water usage, Axiomtek's environmental team has since 2015 began ISO14064 greenhouse emission inspections on direct emissions (scope 1), indirect emissions from energy sources (scope 2), indirect emissions from other sources (scope 3), the scope of which is as follows:

| Scope  | Category   | Equipment (Emission Source)   |
|--|--|---|
|  | Fixed combustion source: Refers to combustion of fixed facilities e.g., emergency power generators. Mobile combustion source:  | No such facility.  Business vehicles - Petrol and   |
|  | refers to combustion from transportation e.g., cars  | diesel (CO <sup>2</sup> , CH <sup>4</sup> , N <sup>2</sup> O)   |
| Scope 1<br>Direct<br>Greenhouse Gas<br>Emissions         | Emission source: refers to intentional or unintentional emission e.g., methane from equipment connections, leakage from fissures or during wastewater management; carbon dioxide from firefighting equipment; HFCs released from air- conditioners, coolers, and   | CO <sup>2</sup> fire extinguisher (CO <sup>2</sup> ) Drinking fountain, air- conditioner, refrigerator, AC units in business vehicles, dryer, Chamber (HFCS) Septic tank (CH4)  |
| Scope 2  | household freezers. Originate from externally  | Externally sourced power  |
| Energy Indirect<br>Greenhouse Gas<br>Emissions           | sourced power, heat, steam, or other fossil fuel-derived energy sources.   | (CO <sup>2</sup> )  |
| Scope 3<br>Other Indirect<br>Greenhouse Gas<br>Emissions | Example: Employee business travel; transportation of damaged / unwanted material or packages by 3rd parties; foreign aid activities, outsourced manufacturer, and authorized distributors; when the greenhouse emissions originate outside the facility boundaries or from waste generated by the facility; employee commute to/from the workplace (includes emissions from non-energy raw materials). | Transportation of documents and parcels - gasoline, diesel (CO <sup>2</sup> , CH <sup>4</sup> , N <sup>2</sup> O), refrigerant (HFCs) Clearing and transportation of waste - gasoline, diesel (CO <sup>2</sup> , CH <sup>4</sup> , N <sup>2</sup> O), refrigerant (HFCs) Employee commute to/from workplace and business travel - gasoline, diesel (CO <sup>2</sup> , CH <sup>4</sup> , N <sup>2</sup> O), refrigerant (HFCs) Vending machines - refrigerant (HFCs) |

The 錯誤! 找不到參照來源。 and 錯誤! 找不到參照來源。 greenhouse emission survey reports indicate that the greenhouse gas emissions generated by electricity provided outside the organization's boundaries account for 88.29% of the total emissions. In accordance with our love the earth concept, Axiomtek's greenhouse gas reduction strategy stipulates a reduction of 1.5% every year to achieve the goal of power conservation /reduction of greenhouse emissions.

|         |                   | Sco                 | pe 1             | Scope 2            | Scope 3                        | Total<br>Emission             |                                    |

| 錯誤 找到照源 | 0.00              | 4.22                | 3.60             | 243.25             | 1,893.36                       | NA                            | 2,144.43<br>(Note 2)               |

Note 1: Update the data based on the actual inventory data after certification of the 2023 Greenhouse Gas Inventory Report

Note 2: The 2023 inspection and certification data are still being counted. The current statistical data does not include the group's subsidiaries and Category 3. A complete inspection report is expected to be issued in the second half of 2024.

As Axiomtek has become more rigorous in its greenhouse gas inventory, the 2023 inventory scope has been expanded to include the group's subsidiaries. In addition, as inventory technology was not mature in the past, the scope of the Scope 3 inventory was limited to only five behavioral indicators. By 2023, all items in Scope 3 have been fully covered. Therefore, the total emission equivalent in the 2023 greenhouse gas inventory report has increased significantly compared to the past, demonstrating Axiomtek's emphasis on greenhouse gas inventory and environmental sustainability. However, as the 2024 inventory certification data is still being compiled, there is no two-year comparative data on the same basis for reference.

Starting from 2025, the ratio of the Group carbon emissions to the Group revenue is expected to decrease by 3% each year; the design of green and energy-saving products and the improvement of product recycling ratio were initiated. In 2025, the Company held a carbon reduction creative competition to encourage employees to participate in creative proposals for carbon reduction actions. It is expected that green and energy-saving products will account for 5% of the Company's product revenue in 2025. In addition, the OKR indicators for performance evaluation of senior executives already cover ESG-related indicators.

It is expected that the carbon reduction target will be set in 2025 and submitted to SBTi, and that the customer requirements will be met in 2032, with carbon emissions reduced by 32% (2024 is the base year).

### (II) Changing of Climate and Energy Conserving

Axiomtek loves the earth and is always concerned about the issue of climate change and are committed to reducing energy consumption. Since the adoption of the Paris Agreement in 2015, the global issue of climate change and energy management has officially entered a new stage. Not exceeding 2 degrees Celsius has become a global urgent management issue. As part of the manufacturing industry, energy conservation and environmental protection to reduce greenhouse gas emissions are also our important responsibility. In order to achieve the goal of reducing energy consumption, the Company has implemented measures for saving water/ energy/ paper and recycling of computers for re-use.

|             | 1. Use energy-saving lamps.   |
|-------------|---|
|             | 2. Use sunshade to reduce sun exposure.                                     |
|             | 3. Install air circulating fan to AC air outlets, adjust indoor temperature |
|             | (1st floor of Xizhi Plant), reduce compressor starting frequency.           |
|             | 4. Spread the word about not using electrical power during lunch            |
|             | breaks and after hours.   |
| Water and   | 5. Increase the ice water temperature of the air conditioner main unit,     |
| Electricity | reduce the compressor starting frequency, and avoid waste of                |
| Saving      | resources.  |
| Measures    | 6. Set the SLEEP function for the water dispenser during non-working        |
|             | hours to reduce power consumption.  |
|             | 7. Implement air conditioning main unit ice water pipeline insulation       |
|             | measures.   |
|             | 8. Understand the actual power consumption and count the power              |
|             | statistics of each region as the basis for improvement.                     |
|             | 9. Use water-saving taps in the bathrooms.                                  |
|             | 1. Implement electronic sign-off system, digitize document signing,         |
|             | digitize technical documents, promote double-sided printing                 |
|             | internally and make good use of second-hand paper to save paper.            |
|             | 2. Do not print the fax number on the business card. Replace faxes          |
|             | with electronic file transfer.  |
| Paper       | 3. In addition to the employees using their own eco-cups, visiting          |
| Saving and  | customers to also use eco-cups to reduce the use of paper cups.             |
| other       | 4. Promote waste sorting, increase the number of recyclable resources,      |
| Measures    | and reduce the amount of general waste                                      |
|             | 5. Encourage employees to go to work by public transport or carpool.        |
|             | 6. Advocate employees to use environmentally friendly tableware to          |
|             | reduce waste generation and related resource consumption.                   |
|             | 7. Donate used PCs or NBs to related agencies for use by vulnerable         |
|             | groups  |
|             |   |

## (III) Waste treatment and resource recovery

Axiomtek Investigates the types of waste generated in the factory into three categories: general domestic waste, general business waste, and hazardous business waste. The three categories of waste have different management modes as shown in the table below:

|                         | 2                          |                          |                |
|-------------------------|----------------------------|--------------------------|----------------|
| Classification          | Waste Content              | Treatment                | Final          |
| Classification          | waste Content              | Treatment                | Treatment      |
|                         | Wastanan an/a1a as         | Xizhi Headquarter-       |                |

| Hazardous<br>Business Waste | PCB waste board edge  | Entrust a qualified removal company to handle | Sanitary<br>landfill<br>Incineration |

Axiomtek also pays attention to waste contractors every year. If the contractor breaches the contract or violates government regulations, it will take corresponding disposal or counseling or replacement. There is no major breach of contract or violation of laws by waste contractors in 錯誤! 找不到參照來源。.

#### 1. General domestic waste

Axiomtek Xizhi headquarters and Xizhi factory have different disposal methods for the domestic waste generated. The Xizhi headquarters entrusts the building management committee to collect and dispose of them, and both the Xizhi factory and the relocated Xizhi factory are independent buildings, so it is entrusted to be recycled by special personnel and entrusted to qualified cleaning and disposal operators. It also stipulates that general domestic waste is unified into general waste and resource waste (wastepaper, glass bottles, plastics, iron and aluminum cans). Except for waste that can be recycled and reused, general wastes are disposed of by sanitary landfill or incineration. Review the annual removal contract weight of general household waste as follows:

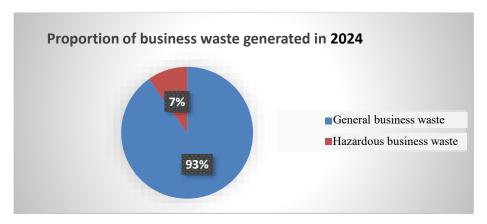

| Factory               | Contract Weight/Month | Treatment   |
|-----------------------|-----------------------|---|
| Xizhi<br>Headquarters | 2.0 metric tons       | Management committee Entrust a qualified removal company to handle      |
| Xizhi Factory         | 1.6 metric tons       | Special person to recycle Entrust a qualified removal company to handle |

#### 2. General business waste

Axiomtek not only entrusts legal manufacturers to remove and dispose of industrial waste but also cares about the final disposal method of the manufacturer. Only after reviewing the final disposal process of the manufacturer's waste can, we safely approve the appointment.

Axiomtek's waste output in 錯誤! 找不到參照來源。 is approximately 45.13 metric tons, as shown in the figure below. Since Axiomtek is mainly based on SMT/DIP assembly/testing process, the proportion of hazardous industrial waste is relatively low, and the output of hazardous industrial waste is about 3.22 tons, accounting for about 7% of the total waste. Moreover, the output of hazardous waste materials slightly decreased by 0.68 metric tons compared to 2023, mainly due to the increase in outsourcing production proportion in response to the relocation operation in 2023. Therefore, the PBC waste produced in the factory showed a downward trend in the current year. The total output of general business waste is about 41.91 tons, accounting for about 93% of the total. Axiomtek produces most of the hazardous industrial waste in the production process, PCB waste. In the future, we will continue to improve the process yield, reduce the output of PCB waste, and achieve the effect of industrial waste reduction.

Axiomtek also listed "1.0% reduction in the proportion of non-recyclable business waste compared with the previous year" as its annual waste reduction target. Monitor the output of non-recyclable waste during the three years as follows. In 錯誤! 找不到參照來源。, there was a slight increase of 17.27 metric tons compared with 錯誤! 找不到參照來源。. The reason for the decrease in total output was that the factory implemented garbage classification to increase the proportion of recyclable waste and thus reduce the output of plastic waste.

## III. Adherence to environmental protection regulations

Axiomtek has not been involved in any major violation of environmental laws and regulations since its establishment. Axiomtek's Xizhi headquarters and Xizhi factory have introduced ISO 14001 environmental management system to ensure that environmental management is strictly required while pursuing operations. Compliance with local government environmental regulations is the most basic requirement for Axiomtek's environmental management standards. Therefore, we take zero environmental violations as the basic goal of sustainable development. The management strategy includes regular identification of environmental regulations, employee training, and regular monitoring of various environmental indicators to achieve sustainable development.

#### Note 7: Statement of Axiomtek Co. Ltd. Social Responsibility

## 艾訊股份有限公司社會責任宣示

## Axiomtek Co., Ltd. Social Responsibility Declaration

艾訊股份有限公司為專業工業電腦產品製造之企業,自創立以來深刻了解員工與供應商夥伴為 企業永續發展中最重要的資產,因此在公司產品之研發、製造、測試、銷售過程中,應善盡企 業社會責任,並遵循相關法規、國際標準與客戶要求:

Axiomtek Co., Ltd. is a professional manufacturer of industrial computer products. Since its establishment, the company has deeply understood that employees and supplier partners are the most important assets for sustainable corporate development. Therefore, throughout the processes of product research and development, manufacturing, testing, and sales, we are committed to fulfilling our corporate social responsibility while complying with relevant regulations, international standards, and customer requirements.

#### 在此承諾我們的社會責任總體政策為:

We hereby commit to the following overall social responsibility policies:

- 符合客戶及法令要求,維護員工人權。
   Comply with customer requirements and legal regulations to uphold employee rights.
- 採取最高廉潔道德標準,作為從事商業經營及員工操守準則。
   Adhere to the highest standards of integrity and ethical conduct in business operations and employee behavior.
- 確保工作環境及作業安全・以零災害為目標。 Ensure workplace safety and operational security with a goal of zero incidents.
- 落實綠色環保政策,以達永續經營。
   Implement green environmental policies to achieve sustainable operations.
- 設計並執行符合法令及客戶要求之管理系統,減輕經營風險並持續改進。
   Design and execute management systems in compliance with legal and customer requirements to mitigate business risks and drive continuous improvement.

#### 在此承諾我們的勞動與人權政策為:

We hereby commit to the following labor and human rights policies:

- 不使用棄工,不使用強迫、抵債或非自願的勞工。
   Prohibit the use of child labor, forced labor, bonded labor, or involuntary labor.
- 與勞工建立正規且可自由選擇的僱傭關係。
   Establish formal and freely chosen employment relationships with workers.

## PXIOMTEK

- 工作及休息時間符合勞基法規定。
   Ensure that working hours and rest periods comply with labor laws and regulations
- 支付給員工的薪資福利符合所有適用的法令。
  Provide wages and benefits in full compliance with all applicable legal requirements.
- 公平對待與尊重每位員工,不以體罰、威脅、侮辱、虐待等不人道方式對待。
  Treat all employees with fairness and respect, prohibiting corporal punishment, threats, insults, abuse, or any other inhumane treatment.
- 提供平等的工作機會,不因種族、膚色、年齡、性別、性傾向、殘疾、國籍、懷孕、 宗教、政治背景、社團成員、婚姻或其他法律規範等有所歧視。
   Provide equal employment opportunities without discrimination based on race color age gender sexual orientation, disability, nationality, pregnancy.

race, color, age, gender, sexual orientation, disability, nationality, pregnancy, religion, political affiliation, union membership, marital status, or any other legally protected characteristic.

尊重員工言論自由及結社自由,以及集體談判的權利,建立申訴管道,保障員工不受 報復及威脅。

Respect employees' freedom of speech, freedom of association, and collective bargaining rights, while establishing grievance mechanisms to protect employees from retaliation and threats.

提供安全衛生的工作條件與處所。
 Provide safe and healthy working conditions and environments.

遵守當地適用之相關勞動法令、客戶規範,以及國際準則。
 Comply with all applicable local labor laws, customer requirements, and international standards.

## 在此承諾我們的環境政策為: (同 ISO14001)

We hereby commit to the following Environmental Policy: (Aligned with ISO 14001)

- 環保無限 Environmental Protection Infinity
- 資源永續 Natural Resources Sustainable

#### 在此承諾我們的職安衛政策為:(同 ISO45001)

We hereby commit to the following Occupational Safety and Health Policy: (Aligned with ISO 45001)

- 『遵法施教、溝通參與、管控風險、提升績效』
  - Compliance and Education, Communication and Participation, Risk Management, and Performance Enhancement.

在此承諾我們的誠信經營政策為:

We hereby commit to the following Ethical Business Policy:

公司應本於廉潔、透明及負責的經營理念,制定以誠信為基礎之政策,並建立良好之公司治理及風險控管機制,以創造永續發展之經營環境。本公司依循董事會通過之「公司誠信經營守則」、「艾訊股份有限公司道德行為準則」、「艾訊股份有限公司誠信經營作業程序與行為指南」等政策,進行宣導及執行作業。

The company shall uphold the principles of integrity, transparency, and accountability in its business operations by formulating integrity-based policies and establishing sound corporate governance and risk management mechanisms to create a sustainable business environment.

The company follows the policies approved by the Board of Directors, including the "Corporate Integrity Management Guidelines", the "Axiomtek Code of Ethical Conduct", and the "Axiomtek Integrity Management Procedures and Conduct Guidelines," to promote and implement integrity management practices.

#### Note 8: Supplier Audit and Evaluation Work

## Procurement management process

In order to enable raw material suppliers to establish a close working relationship and feedback system with Axiomtek, to improve product quality, and to supply materials required for production in a timely, appropriate and quality manner, to achieve stable quality and reduce costs, all cooperating suppliers must pass the evaluation standards set by Axiomtek's supplier management regulations to ensure that the raw materials can meet the regulatory requirements, and through the supplier's evaluation, regular evaluation mechanism, to manage the supplier's delivery status and quality.

# Step 1 Selection of new suppliers

• After the supplier is approved by the sample and fills in the relevant documents, it will be reviewed by the head of the department, and the R&D and quality control unit will be

#### Step 2 Qualified supplier audit

• A supplier evaluation form should be attached, which meets the requirements of relevant environmental protection regulations, humanitarian care and integrity. Only those who pass the review can be included in the "Qualified Supplier List" and become a qualified supplier.

## Step 4 Suppliers are regularly assessed

• Comprehensive assessment is conducted quarterly on the delivery time, quality and service of suppliers with transaction records.

#### Step 3 Supplier monitoring

• With delivery time, quality and service as monitoring indicators, it is used to compare whether suppliers meet Axiomtek's needs.

#### ■ Supplier evaluation/audit

In order to evaluate the quality and added value of suppliers' products and services, Axiomtek conducts supplier evaluations on quality, delivery time and services once a quarter (executed in January, April, July and October), and according to the evaluation results, the level of follow-up contacts with suppliers will be determined. If the supplier's grade is below grade B (inclusive) and above grade C, the relevant unit will draw up an audit list based on the score at the quality meeting. The purchasing department confirms the audit schedule with the suppliers according to the list, and cooperates with QC, engineering, QA and other departments to conduct on-site audits and re-evaluate the suppliers.

provide improvement reports

and re-evaluate.

■ Judgment and handling of evaluation levels

Grade C, below 59 points

Depending on the situation, the order quantity may be reduced or the qualification of qualified suppliers may be cancelled.

Conduct supplier risk

Conduct supplier risk assessments when necessary and propose improvement measures as needed. Grade A, above 80 points, increase the purchasing ratio.
Priority purchase object for general normal purchase

| Item | Execution Status                |   |  |  |  |
|------|---------------------------------|---|--|--|--|
|      | Risk                            | Financial Impact  |  |  |  |
|      | Transition risk                 | According to the climate change response law, carbon fees will be levied in         |  |  |  |
|      | Carbon fee for greenhouse gas   | 2025 for products that directly or indirectly emit high emissions. The possible     |  |  |  |
|      | emissions                       | financial impact of this structural risk is an increase in operating costs. At this |  |  |  |
|      |                                 | stage, the Company is not a high-carbon emission industry, so it has a moderate     |  |  |  |
|      |                                 | impact on the overall operation. At present, the Company continues to carry out     |  |  |  |
|      |                                 | comprehensive greenhouse gas inventory, and will also carry out assessment          |  |  |  |
|      |                                 | operations for the purchase of green electricity, biomass energy and other parts,   |  |  |  |
|      |                                 | and set carbon reduction targets, in the hope of achieving zero net emissions in    |  |  |  |
|      |                                 | 2050.   |  |  |  |
|      |                                 | It is estimated that Taiwan Province will levy a carbon fee: 1 ton of carbon fee    |  |  |  |
|      |                                 | will be collected in advance from NT \$500, and the annual emission in 2022         |  |  |  |
|      |                                 | will be 1,700 metric tons, with an estimated increase of NT \$850,000 and a         |  |  |  |
|      |                                 | short-term increase of NT \$4 million, with low financial impact.                   |  |  |  |
|      | Transition risk                 | The EU's CBAM trial operation in October 2023 plans to impose carbon tariffs        |  |  |  |
|      | Carbon tariff on greenhouse gas | on products in 2026. Based on the current EU shipments accounting for about         |  |  |  |
|      | emitting products (CBAM)        | 20% of revenue, it is estimated that the cost of carbon taxes will increase by      |  |  |  |
|      |                                 | 5%, which will have an overall impact on revenue of about 1% and have a low         |  |  |  |
|      |                                 | financial impact.   |  |  |  |
|      | Transition risk                 | In response to the requirements of the competent authority, all listed cabinets     |  |  |  |
|      | Carbon emissions information    | are required to complete greenhouse gas inventory and disclosure in a timely        |  |  |  |
|      | disclosure                      | manner.   |  |  |  |
|      |                                 | Estimated financial impact: Starting from 2022, the Company will fully comply       |  |  |  |
|      |                                 | with the requirements of ISO 14064-1 greenhouse gas inventory system, with          |  |  |  |
|      |                                 | an investment cost of NT \$400,000. The short-term 5-year operational impact        |  |  |  |
|      |                                 | will increase by NT \$2 million, indicating a low financial impact. the             |  |  |  |
|      |                                 | Company's response strategy is that the parent company has investigated and         |  |  |  |

| Item | Execution Status                  |   |  |  |
|------|-----------------------------------|---|--|--|
|      |                                   | disclosed on the annual report official website, and the subsidiary will complete |  |  |
|      |                                   | it before the regulatory deadline.  |  |  |
|      | Transition risk                   | In response to the product's compliance with ISO 14067 and environmental          |  |  |
|      | Customers demand low-carbon       | standards, it is necessary to conduct a carbon footprint inventory and achieve    |  |  |
|      | products                          | low-carbon transformation. It is estimated that the supply chain, transportation, |  |  |
|      |                                   | and low-carbon processes will fully comply, and a single product will require     |  |  |
|      |                                   | an additional cost of NT \$3 million, with low financial impact. the Company      |  |  |
|      |                                   | plans to complete product carbon footprint certification from 2024 to 2026.       |  |  |
|      | Transition risk                   | Due to carbon tariffs and the demand for low-carbon goods from customers, the     |  |  |
|      | Rising raw material costs         | cost of raw materials has increased, resulting in an estimated increase of about  |  |  |
|      |                                   | 15% to 20% in product costs, with a moderate financial impact. The Company's      |  |  |
|      |                                   | response plan is to continuously monitor carbon tariff requirements in various    |  |  |
|      |                                   | countries and develop new suppliers to mitigate the impact of rising raw          |  |  |
|      |                                   | material costs.   |  |  |
|      | Physical risk                     | It may cause natural disasters to the Company's operating base, increase          |  |  |
|      | The severity and frequency of     | maintenance costs for building equipment, and even cause operational              |  |  |
|      | extreme weather events such as    | interruptions or casualties. The Company's response measures are to develop       |  |  |
|      | typhoons and floods will increase | suppliers from multiple sources, and establish emergency response mechanisms      |  |  |
|      |                                   | related to typhoon and rainstorm to reduce immediate risks. Based on the actual   |  |  |
|      |                                   | impact of typhoons on Taiwan's operating base in the past three years, which      |  |  |
|      |                                   | caused an operational interruption, the estimated loss for the repair of the      |  |  |
|      |                                   | operating base is NT \$1 million, and the financial impact is low.                |  |  |
|      | Physical risk                     | In the middle and late 21st century, the annual average temperature may rise by   |  |  |
|      | Average temperature rise          | more than 1.8°C and 3.4°C. The number of days with high temperatures above        |  |  |
|      |                                   | 36°C has increased in various places, with the increase range of about 8.5 days   |  |  |
|      |                                   | and 48.1 days in the middle and late 21st century, especially in urban areas. Due |  |  |
|      |                                   | to the transformation of power structure in Taiwan Province, it is estimated that |  |  |

| Item | Execution Status                        |  |  |
|------|---|--|--|
|      | Opportunity                             | the electricity price will gradually increase in the future, which will increase the Company's operating costs. On the premise of fixing the electricity price, if the electricity consumption increases by 5% for every 1 °C temperature increase, the annual electricity fee will increase by 7.5%, and the financial impact will be low. The subsequent response plan will consider the use of renewable energy and the purchase of green electricity certificates.  Financial impact |  |
|      | Use more efficient production processes | The use of high-efficiency equipment and tools can effectively improve production efficiency, bring opportunities to reduce electricity costs, and reduce greenhouse gas emissions between categories, resulting in low financial impact.  |  |
|      | Recycle                                 | The recycling strategy of waste in circular economy will become more and more important, reducing the cost of waste treatment, recycling plastic parts or the utilization rate of biomass energy will reach more than 90%, and the financial impact will be low because of the small amount of waste.  |  |

| Item   | Execution Status  |  |  |
|--|---|--|--|
| (4) Describe how the identification, evaluation, and   | The Company has implemented climate risk governance in accordance with the TCFD Climate Change Financial  |  |  |
| management processes of climate risks are  | Information Disclosure Guidelines and is effectively operating. The progress of the 2024 annual performance and   |  |  |
| integrated into the overall risk management  | sustainability report was reported to the board of directors on July 25, 2024.  |  |  |
| system.  | Collection of climate and environmental background information by members of the Sustainable Development Committee  Climate risk and operational scope assessment  Establish a project inventory of climate risks and opportunities  Create an internal operational impact questionnaire  Sustainability committee conducts climate risk opportunity and operational impact analysis  Decide on major risk projects  Establish execution strategy and goal setting  Conduct annual rolling reviews of the effectiveness of implementation strategies and goals through Sustainability Committee meetings  |  |  |
| (5) If situational analysis is used to evaluate resilience to climate change risks, the scenarios, parameters, assumptions, analysis factors, and main financial impacts used should be explained. | A. Set the benchmark scenario and 2 C scenario to identify and analyze the short, medium and long-term climate risks and opportunities of the Company's business scope and the whole life cycle of assets. In the transition risk, baseline scenario and 2 C scenario, RCP8.5 and RCP 2.6 climate scenarios of IPCC are cited respectively, and the immediate entity risk and long-term entity risk are assessed.  B. The average temperature continues to rise, resulting in an increase in energy consumption and operating costs. In response to an increase in the average temperature of the whole station by 1 degree, resulting in an increase in electricity consumption by increase 5%, if the unit price of electricity remains stable, it is estimated that the electricity consumption and derived electricity charges will by at least 22.5% in a short period of three years by raising the temperature by 1.5 degrees. |  |  |

| Item   | Execution Status   |  |
|--|--|--|
| (6) If there is a transformation plan for managing   | In response to rising temperatures:  |  |
| climate related risks, explain the content of the    | A. The factory has completely replaced old lamps with cost-effective LED lamps.  |  |
| plan, as well as the indicators and goals used to    | B. Set up induction devices in the factory to avoid unnecessary waste of electricity.                                  |  |
| identify and manage entity risks and                 | C. Evaluate the construction of energy storage systems to reduce electricity costs.                                    |  |
| transformation risks.                                |  |  |
|  | Resource efficiency improvement and low-carbon products:   |  |
|  | A. Continuously updating the old generation production equipment in the factory, the new equipment not only saves      |  |
|  | energy, but also reduces production costs and improves production performance by improving production efficiency.      |  |
|  | B. The R&D department's products include the use of PCR materials and the development of low-carbon raw materials,     |  |
|  | aiming to achieve high efficiency in product performance and circular economy.   |  |
|  | C. The factory is evaluating the comprehensive installation of solar power generation equipment in the factory area.   |  |
|  | Related indicator goals:   |  |
|  | A. Completed the group's ISO 14064 inventory inspection between 2024 and 2026, and passed third-party verification;    |  |
|  | Complete a product carbon footprint inventory and obtain environmental protection labels before 2026.                  |  |
|  | B. The R&D department follows the ESG trend and develops efficient and energy-saving products.                         |  |
|  | C. Continuously optimize the process and improve performance to reduce production energy consumption.                  |  |
| (7) If internal carbon pricing is used as a planning |  |  |
| tool, the basis for setting the price should be      | There is no internal carbon pricing yet.   |  |
| stated.  |  |  |
| (8) If climate related goals are set, information    | Emissions reduction targets  |  |
| should be provided on the activities covered,        | Compared with the base year of 2023 of the headquarters  |  |
| greenhouse gas emission categories, planning         | 20% reduction in greenhouse gas emissions in Scope 1 + Scope 2 in 2030   |  |
| period, and annual progress achieved; If carbon      | 30% reduction in greenhouse gas emissions in Scope 1 + Scope 2 in 2040   |  |
| credits or renewable energy certificates (RECs)      | The Company plans to purchase renewable energy certificates starting from 2030, and the purchase amount is the scope 2 |  |
| are used to achieve relevant goals, the source       | purchased electricity usage.   |  |
| and quantity of carbon reduction credits to be       |  |  |
| offset or the quantity of renewable energy           |  |  |

| Item   | Execution Status     |  |
|--|----------------------|--|
| certificates (RECs) should be explained.           |                      |  |
|  |                      |  |
| (9) Greenhouse gas inventory and confirmation of   |                      |  |
| the situation, reduction goals, strategies, and    | Refer to 1-1 and 1-2 |  |
| specific action plans (to be filled out separately | Refer to 1-1 and 1-2 |  |
| in 1-1) and (1-2).                                 |                      |  |

- 1-1 Company greenhouse gas inventory and confirmation status in the last two years
- 1-1-1 Greenhouse gas inventory information

Describe the emission volume (metric tons CO2e), intensity (metric tons CO2e/million yuan) and data coverage of greenhouse gases in the past two years.

| Item<br>Year | Scope 1 (tons of CO2e) | Scope 2 (tons of CO2e) | Total emissions<br>Scope 1+2 (tons of CO2e) | Information covers: 2023 Taiwan parent company, German |
|--------------|------------------------|------------------------|---|--|
| 2023         | 2,032.1895             | 2,046.8069             | 4,078.9964                                  | subsidiary, USA subsidiary 2024 Taiwan parent company  |
| 2024         | 251.0703               | 1,893.3591             | 2,144.4294                                  |  |

1-1-2 Greenhouse gas confidence information (statement of the assurance situation in the past two years, including the extent of the assurance, assurance organization, assurance criteria and assurance opinions)

The parent company of the Company's greenhouse gas emissions inventory has appointed a third party, the British Standards Institution BSI, to conduct verification starting in 2021. The verification of the 2024 annual information is expected to be completed in the third quarter of 2025.

1-2 Greenhouse gas reduction goals, strategies and specific action plans

| Emissions Reduction Targets                          | Strategic Action  | Planning Schedule |
|--|---|-------------------|
| Compared with the base year of 2023                  | (1) Through green procurement, purchase                 | (1) 2023~2030     |
| 20% reduction in greenhouse gas emissions in Scope 1 | environmentally friendly infrastructure equipment,      |                   |
| + Scope 2 in 2030                                    | and fully replace refrigeration and air conditioning    |                   |
| 30% reduction in greenhouse gas emissions in Scope 1 | systems with energy efficiency level 1.                 |                   |
| + Scope 2 in 2040                                    | (2) Implement energy-saving projects for facilities and | (2) 2023~2030     |
|  | equipment   |                   |
|  | (3) Renewable energy usage and purchase of green        | (3) 2023~2040     |
|  | electricity certificates                                |                   |
